Product Specification Sheet

Keyshure™ Copper Proteinate

Conforms to AAFCO definition #57.23

"product resulting from the chelation of a soluble salt with amino acids and/or partially hydrolyzed protein"

Composition:

Guaranteed minimum analysis:

Copper (Cu) - 15%

Other typical analyses:

Crude protein - 35%

Dioxin TEQ - < 1 ppt

Arsenic (As) - < 12 ppm

Lead (Pb) - < 15 ppm

This product contains hydrolyzed vegetable protein.

No animal products or animal byproducts are used in the manufacturing process.

Appearance: Green powder.

Application: An organic trace mineral feed additive in a chemically stable form for livestock, poultry, aquaculture, and pet food.

Dosage: Use in accordance with in-house requirements or with current NRC guidelines. This product is normally recommended to replace from 33% to 50% of the added dietary inorganic copper.

Precautions: Generally regarded as safe (GRAS).
Avoid contact with eyes and skin. Avoid breathing dust.
Wash thoroughly after handling.

Density: 900 kg/m³ (approximately).

Storage: Store in a cool, dry place (organic material).

Packaging: 25-kg poly-lined bags or in bulk bags.

Shelf life: Minimum 5 years, if kept dry in unopened bags.

Manufactured at: Chelated Minerals Corporation, a Balchem Company
3310 West 900 South, Salt Lake City, UT 84104 USA
This facility is FEMAS certified, no. 44651
