

QUINGUARD[®] M6S Feed Preservative

DESCRIPTION

QUINGUARD M6S feed preservative provides unsurpassed protection from oxidative rancidity. QUINGUARD M6S protects essential ingredients and prolongs nutritional shelf life in complete feed.

FEEDING INSTRUCTIONS

Use as an antioxidant additive mixed in suitable meals and premixes prior to addition to the final feed, or in the final feed.

Add QUINGUARD M6S at rates of:

- 500g to 1500g per metric tonne (1.0 to 3.0 lb/ton) of meal
- 187g per metric tonne (0.4 lb/ton) of final feed
- Up to 25kg/metric tonne (50lb/ton) of vitamin-mineral premixes

Inclusion rates are based on an "as fed" basis.

In finished feeds, total ethoxyquin from QUINGUARD M6S and any other source of ethoxyquin must not exceed 150ppm (0.3 lb/ton).

NUTRIENT SPECIFICATIONS

- Ethoxyquin
- Amorphous Precipitated Silica

PRODUCT CHARACTERISTICS

Appearance:	Brown to black granules
Odor:	Sweet odor
Solubility in Water:	Not applicable
pH:	Not applicable
Density:	35-45 lbs./cubic foot
Packaging:	25 kg (55 lb) paper and plastic composite bag
Shelf Life:	2 years when stored as directed
