

RONOZYME[®] P-(M)

Description

RONOZYME[®] P-(M) is a granulated phytase preparation (IUB No. 3.1.3.26) from *Peniophora lycii* produced by submerged fermentation of a genetically modified *Aspergillus oryzae* micro-organism. The average particle size is 240 µm. The color may vary from batch to batch, and color intensity is not an indication of product strength.

Product identification

Product code: 50 0822 0

Specifications

Appearance: beige, coated, non-dusty granulate.

Phytase activity*: min. 50000 FYT/g

*Declared activity

Dosage range

15–60 g per ton of feed, mixed into the feed before any final pelleting of the feed.

Stability and storage

RONOZYME[®] P-(M) maintains its declared activity for at least 6 months from the date of manufacture when stored in the unopened original container and at a temperature below 25°C. Prolonged storage at temperatures above 30°C should be avoided. The 'best used before' date is printed on the label.

Uses

As a feed additive. RONOZYME[®] P-(M) is intended for use in unprocessed (mash) feed only and should not be used in heat processed feed.

Safety

This product is safe for the intended use. Avoid ingestion, inhalation of dust or direct contact by applying suitable protective measures and personal hygiene.

For full safety information and necessary precautions, please refer to the respective DSM Material Safety Data Sheet.
